

Connect to the nbn[®] network today

Congratulations on the purchase of your new home, built with an nbn connection

Buying a new home is an exciting moment in our lives, but we know that moving can be stressful. nbn can help make this easier, giving you one less thing to think about. Connect to nbn fast fibre today and you can take advantage of any smart devices and appliances in your new home straight away.

Why connect to nbn's fastest and most reliable fibre connection for your home?

Flexibility to suit your needs

Providers offer a range of plans and speeds to suit your lifestyle, in some cases including no lock-in contract options.

Seamless working & learning from home

A strong, reliable connection* means you can make working from home a breeze with clear video calls and fast downloads.

High quality streaming

Fast connection speeds* mean you can stream the latest movies, TV shows, music and more from the comfort of your home.

Next-level gaming

With high bandwidth, you can give your gaming the edge with fast downloads and gameplay.

To ensure your internet is up and running on move-in day, we recommend the following steps:

- 1 Choose a provider**
You'll need to connect via an phone and internet provider (not via nbn). You can find a list of providers at nbn.com.au/providers.
- 2 Select a plan that suits your needs**
Contact your preferred provider to request a connection to an nbn powered plan. Ask them about nbn Home Ultrafast - more than 15 times faster than nbn Home Standard.*
- 3 Connect**
The provider will organise connection and help with any equipment needed. Be sure to ask them about additional costs and minimum periods if you decide to connect.

Experience the power of fast nbn connectivity today

Scan the QR code or visit nbn.com.au/checkaddress to view providers you can contact to get connected.

* Conditions, eligibility and costs will apply - please speak with your preferred provider. Additional costs may apply to providers, who may choose to pass this charge onto their customers. Your experience on nbn FTTP, including speed, depends on your internet provider, plan, equipment quality and if you use the internet at peak times.
